

BARBARA
BOMBACHINI
VISUAL RESUME

BARBARA BOMBACHINI

Visual presentation of my recent work and personal information, in a magazine format to offer a more pleasant and interesting reading experience.

HELLO

My name's Barbara Bombachini, I'm a photographer and Web Developer currently living in London, Ontario.

My relationship with photography started when I was 16 and invested all my savings into an analogical Pentax K1000 and a pair of Kodak films.

At that time, a career in photography seemed like a blurry and unreachable path, very far from my reality, which I would constantly dreamed about.

After studying Perfoming and Dramatic Arts for 2 years, I decided to take a huge trip through South America by my own. What started as a quick 3 month tour became an almost non-stop backpack trip for 1 year.

Brazil, Paraguay, Bolivia, Peru, Chile, Argentina, Uruguay. It was time enough to discover photography as a possible pathway conciliated with all the benefits technology could provide at that time. I returned with one wish: study, learn, create, make new things possible.

After that I studied photography and journalism, not concluding the last one, because I decided to assume technology as my main focus.

Freelancing and later on, working at Canon Brazil, really opened my mind and I found another passion: web development

ABILITIES AND PROSPECTS

PERSONAL CHARACTERISTICS:

- Great interpersonal skills and multitask.
- Self-starter and self-motivated, fast learner.
- Organized and commitment to results and focus on problem solving.
- Interest in technology, innovation and entrepreneurship.
- Detail-oriented.

PROSPECTS FOR THE FUTURE:

- Get deeper into programming and the web development field. Learn more and get involved with new platforms, frameworks and be able to contribute for the development of apps or programs.
- I also wish to use all my strong visual background in photography to give strength to the creation of web projects as well as expand my skills.

THANK YOU!
